

# RESTAURANTS WEBSITE PROJECT

BY RAHİL HÜSEYNOV

# *About My Website*

A restaurant website is usually a digital platform that showcases delicious food. Such websites often include menus, ordering and payment methods, user profiles, and features for chefs to view order details or add new dishes to the menu.

Technologically, it uses TypeScript, React, CSS and Redux Toolkit, etc.

# *Technologies*

- TypeScript
- React.js
- React Router
- React Testing Library
- CSS
- Redux Toolkit
- RTK Query
- Git. GitHub
